

What they do?

**FDA, cGMP approved pharmaceutical laboratory** that develops Pharmaceuticals, Nutraceutical, & Cosmetics for companies looking to manufacture in U.S.

Problem

**The latest FDA regulation requires that certain types of drugs must be manufactured on U.S. soil** before they are allowed to be distributed in the U.S. market. With higher demand to manufacture in the United States than is currently capable, development time is much longer and more expensive, which can cause significant barrier to enter the market.

Solution

**The Company desires to enter the low-competition market of CDMOs based in the U.S. on the solid foundation of their FDA-Approved CGMP facilities.** Their mission is to develop and test their products affordably, while mitigating risks and leveraging abbreviated drug approval pathways that are granted only to qualified laboratories that manufacture in the U.S.A.

Team

A strong leadership team with **over 50+ years experience** in pharmaceutical industry

Funding

The company has **self-funded over \$1 million** into its current infrastructure

Revenue Projection

The company projects **\$62 million revenue** by 2029.

ASK

The management team is in a **search of strategic partner and financial sponsor to help them build on their existing platform of being a CRO and to becoming the next CDMO ( Chief Development Manufacturing Organization).** They are open to all types of deal structures, including sale of majority equity.
