What they do?

Manufacturing of Smart Medical Chairs and Cabins w/ 11 Diagnostic tools. They are Self-Sanitizing and can be operated 24/7 without any staffing.

Problem

Popularity of Tele-medicine is on the rise due to cost savings and convenience. However, continuity of care is a challenge and patients are looking for new solutions to help them save time, money and avoid crowded clinics when possible.

Solution

Smart Chairs and Cabins that can replace costly brick and mortar clinics. They can be placed in high traffic areas such as malls, super markets and pharmacies. They are self-operated without the need of onsite medical personnel and can be accessed 24/7

Traction

LOIs for delivery of 2100 medical cabins over 5 years to large senior communities, pharmacies and super markets

Team

Highly experienced executive team from companies such as Bell , AT&T, BT, IBM, CVS, HP and major medical centers

Business Model

Rental Fee- Chairs and Cabins \$2k-\$4K /mo
Patients \$15/visit

ASK

The founders and the management team of the Company who have all played a major role in designing, planning, patenting, prototyping the hardware and the software, as well as obtaining initial traction and interest are extending an invitation for collaboration with a strategic and financial sponsor who can assist in launching its production line and deliver the units to its interested customers. The founders are open to all deal structures, including a capital equity raise, Convertible Debt, or a majority equity sale in the company to achieve their goal.
